

Naemu Enggar Mahcaya

FULL-STACK WEB & MOBILE DEVELOPER

Bekasi, Indonesia · +62 851-5692-3271 · naemuenggar@gmail.com · github.com/naemuenggar

PROFESSIONAL SUMMARY

Full-stack web and mobile developer currently pursuing a Bachelor's degree in Information Technology at Telkom University. Experienced in building production-grade applications using **Laravel, Flutter, Firebase, and MySQL**. Proficient in **REST API development**, database schema design, real-time systems with Cloud Firestore, and collaborative workflows via Git/GitHub. Familiar with **secure coding practices** and web application security fundamentals (OWASP).

TECHNICAL SKILLS

Languages	PHP · Dart · Python · Java · JavaScript · SQL · HTML/CSS · C++ · Go
Web Frameworks	Laravel · Tailwind CSS · Bootstrap · Node.js
Mobile	Flutter (Android & iOS) · Dart
Backend & DB	Firebase · MySQL · REST API · RBAC · Database migrations
Dev Tools	Git · GitHub · SonarCloud · CI/CD · Linux · Miro

WORK EXPERIENCE

Full-Stack Web & Mobile Developer

May 2026 – Present

Resto Queue App · Freelance

Flutter · Dart · Firebase Firestore · Cloud Functions · FCM · QR Code

- Built a cross-platform queue management app (Android & iOS) using Flutter/Dart with a real-time backend on Cloud Firestore, supporting concurrent users via atomic transactions and offline persistence.
- Integrated Firebase Cloud Messaging (FCM) and Cloud Functions for automated push notifications when queue numbers are called.
- Implemented a hybrid QR code system — static QR per table for queue intake and dynamic QR per ticket for operator validation.
- Designed a normalized Firestore schema (queues, counters, settings) ensuring data consistency under concurrent load.

Full-Stack Web Developer

Nov 2025 – Dec 2025

MoneyMate Web App · Freelance

Laravel · PHP · MySQL · Tailwind CSS · Bootstrap · GitHub

- Developed a full-stack personal finance web application using Laravel MVC architecture with a MySQL relational database.
- Implemented Role-Based Access Control (RBAC) and structured database migrations for secure multi-user management.
- Delivered a fully responsive UI with Tailwind CSS and Bootstrap, ensuring cross-device compatibility.
- Managed version control and team collaboration via GitHub using branching strategies and pull requests.

PROJECTS

Full-Stack Developer – Social Platform "Makan-Bareng"

Jan 2026 – Jun 2026

Team Project · Firebase · Firestore · GitHub

- Designed and built a real-time chat feature using Google Firestore for a web-based social interaction platform.
- Followed structured Git branching workflow (feature branches + pull requests) in a multi-developer GitHub team.

Lead Researcher – Text Mining & SRS Compatibility Analysis

Sep 2025 – Jan 2026

Academic Research · Python · TF-IDF · Cosine Similarity · NLP

- Built a Python script using TF-IDF vectorization to automate compatibility extraction between Functional Requirements and Use Case Diagrams in SRS documents.
- Applied Cosine Similarity for requirement-model alignment, validated with Gwet's AC1 statistics to minimize analytical bias.
- Produced a full Project Management Plan including WBS, Gantt Chart, and Risk Management documentation.

Lead Developer – OOP Java Application

Jun 2025 – Aug 2025

Academic Project · Java · SonarCloud · GitHub Actions · CI/CD

- Built an OOP-based Java application integrated with SonarCloud on GitHub for automated code quality inspection, bug detection, and code smell analysis.
- Set up a CI/CD pipeline on GitHub, reducing manual review overhead through automated static analysis.

UX Evaluator – Campus Waste Reporting App

Nov 2025 – Dec 2025

Collaborative Project · UX Research · Usability Testing

- Conducted functional testing and provided actionable UX improvement recommendations for a campus waste-reporting prototype at Telkom University.

EDUCATION

Bachelor of Information Technology

2023 – Present

Telkom University, Bandung

Relevant courses: Artificial Intelligence · Data Analysis & Text Mining · Software Engineering · Object-Oriented Programming · Cybersecurity · Research Methodology · IT Project Management

CERTIFICATIONS

Spec-Driven Development with Kiro

Jun 2026

Dicoding & AWS

- Intensive training on Spec-Driven Development (SDD) using AI tool Kiro — covering requirements engineering, structured spec design via Prompt Engineering, and end-to-end SDD implementation.

Certificate ID: N9ZONQKYRXG5 · Valid until June 2029

elevAIte Indonesia Program

Sep 2025

AI Training Program

- Intensive program focused on AI development, industry applications, and technology trends in Indonesia.
